

# **SPARKY THE AI: BUILT FAIRLY FOR EVERY CHILD TO SHINE!**

**An Initiative By  
NATIONAL AI OFFICE**

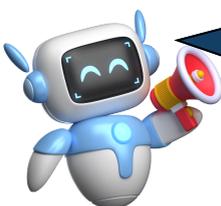

Welcome to the first series of the Ethical AI for Kids interactive activity paper, where we meet Sparky the AI!

In this activity, we'll explore one of the most important ideas in Artificial Intelligence: Fairness. Just like people, AI can sometimes make mistakes if it's only taught with certain information. You'll help Sparky learn how to be fair so it can help every child shine. Get ready to learn how good data and kind choices make AI helpful and fair for everyone!

**DID YOU KNOW?**

AI can be trained to understand many languages! That means it can help people from different backgrounds feel included.

**Sparky the robot didn't water all the plants. Why not?**

Sparky made a mistake because it learned from bad data. If the data leaves some things out or isn't fair, the robot might make mistakes too. But if we give Sparky good data that includes everyone, it can learn to make better, kinder choice

# Sparky's Fairness Guide

Look at each AI fairness rule. Match it with what it means in real life!

Be fair to everyone

•

Share the Good Stuff

•

Only use what's needed

•

Ask Why

•

Explains its thinking

•

Made for everyone

•

If an AI says no or makes a choice about you, you can ask why and tell a teacher or your parents about it.

•

If an AI saves time or helps with work, those benefits should be shared with everyone, not just a few people.

•

People who build AI should get help from many kinds of people, so the AI works well for everyone.

•

AI must treat all the same no matter who they are or what they look like.

•

AI should only use the info they need, like using the right tool for the job.

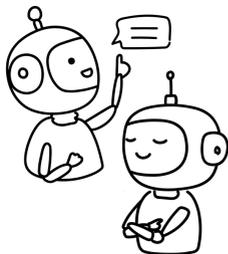

•

AI shouldn't keep secrets. They should explain how they made their choice in a way we understand.

•

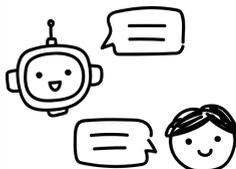

## IS THE AI BEING FAIR? Circle TRUE or FALSE

The AI lets everyone take turns speaking.

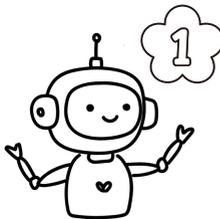

Yes No

The AI only talks to people who speak the same language as it.

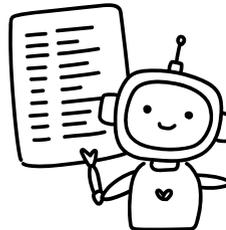

Yes No

The AI gives prizes only to kids it likes best.

Yes No

The AI gives the same game rules to everyone.

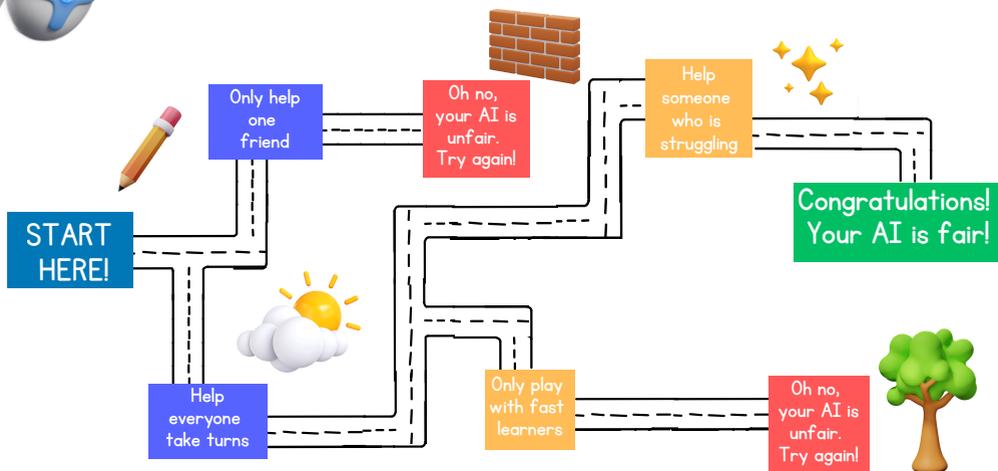

Yes No

# CAN YOU HELP AI MAKE FAIR CHOICES?

Trace the path that leads to a fair AI

## Build-A-Bot: Make Your AI Fair!

### Instructions:

- Look at the symbols below. Each one shows something fair or kind.
- Draw your own robot.
- Choose your favorite symbols and draw them on your robot.
- Give your robot a name.

Treat Everyone the Same
